

More than 125 YEARS of service and innovation

For clean and efficient printers, you can trust our products that are specifically formulated for this industry. Our solvents and cleaners, which have been successfully tested for years, are powerful and secure. Indeed, the absence of acetone and toluene in their formulations makes them much less flammable than other products on the market.

West Penetone products and services meet the production and timing criterias of the printing industry. Our **GRAFIKLEEN** product line is designed to meet these requirements as well as be efficient, safe and respect the environment.

Whether for your printing plates, your rollers, your offset blanket or your ink tanks, we have a specific formulation for every need and every type of equipment. Even your floors will be sparkling clean!

Discover how to ensure the cleanliness of your installations while effectively controlling costs.

Printing: an industry we care about

For the past 125 years, we have met the various challenges of the industrial division. Several times in the West Penetone history, we have demonstrated our capacity to renew and innovate. Recognized as a pioneer in its field, West Penetone has developed innovative products for their efficiency and safety. We have distinguished ourselves by the products we develop and our constant worry of environmental protection.

Our chemical product application procedures are established by our technical team to ensure your cleaning operations are well maintained while keeping your environment safe.
