Most important symptoms and effects, both acute and delayed.

Contact with eyes may cause serious irritation leading to discomfort or pain, redness, swelling, and blurred vision. Contact with skin may cause severe burns or irritation with local redness. Mists or aerosols generated from solutions of the product may be irritating to the eyes, nose, throat, and respiratory tract. Ingestion may lead to, severe burns to the mouth and throat, headache, nausea, vomiting, and perforation of internal organs. Absorption into the body leads to the formation of methemoglobin which can lead to cyanosis. Onset may be delayed.

Indication of any immediate medical attention and special treatment needed.

Treat symptomatically.
