

## WASH BAY - LIQUID CLEANERS

# **ACCUBRITE**

Aluminum brightener

**AccuBrite** is an acidic aluminum brightener formulated to remove the dull, weathered appearance from aluminum trailers and restore the surface to a bright even finish.

**AccuBrite** will remove the pitting and oxidation that commonly occurs during winter vehicle operations where salt and other de-icing chemicals are used.

**AccuBrite** is also effective for cleaning walls in car wash environments.

## **FEATURES & BENEFITS**

- Brightens dull and weathered aluminum
- Removes rust and oxidation caused by de-icing chemicals
- High foaming, for excellent surface coverage and safer application

### DIRECTIONS FOR USE

**Use procedure** 

For the best results, clean surface with an alkaline degreaser or pressure washer soap to remove road soils, oils and greasy films, before applying **AccuBrite**. Apply **AccuBrite** with a low-pressure spray applicator or foamer, starting from the bottom and working to the top of the surface. Follow application with a high-pressure rinse for the most effective brightening results. Avoid prolonged contact with glass to prevent etching.

Concentration 10:1 to 30:1 for cleaning aluminum trailers

Use temperature Use cold water.

Rinsing Rinse

Rinse promptly with high pressure cold water.

# ACCUBRITE ALUMINUM BRIGHTENER

### PHYSICAL PROPERTIES

#### IMPORTANT

Before using **ACCUBRITE** always be sure to read and follow precautions and directions for use appearing on the product's container label, and on the safety data sheet (S.D.S).

## FIRST AID MEASURES

#### Ingestion

Rinse mouth with water and call a POISON CENTER or doctor/physician immediately. Do not induce vomiting unless directed by medical personnel. Drink a glass of milk or water if able to swallow. Administer a fluoride binding substance: chewable calcium carbonate tablets (e.g., Tums<sup>™</sup>) or a cup of milk of magnesia or a liquid antacid (e.g., Maalox<sup>™</sup>). **Skin contact** 

Take off contaminated clothing and immediately wash skin with water for 15 minutes. Severe burns will result without prompt water washing. After washing with water apply calcium gluconate gel. Gel or slurry must be continuously massaged into the affected area to be effective. Seek medical attention if you feel unwell.

#### Inhalation

If difficulties occur after mist/vapors/spray has been inhaled, remove person to fresh air and keep comfortable for breathing. Administer oxygen if shortness of breath develops. Always use a barrier or bag-valve-mask device for assisted ventilation. Call a POISON CENTER or doctor/physician.

#### Eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a POISON CENTER or doctor/physician immediately.
