

IODO RING

TAMED IODINE RING

A blend of iodine, surfactant and gel-agents contained in a mesh bag attached to a rigid plastic ring. This product is designed for use in drains of all types, including those with flowing water.

Upon sufficient exposure to water, high levels of iodine and detergent are released to clean and deodorized standing water in drains, drain traps and condensate trays. Iodine and detergent released into condensate and drip pans will prevent clogging from soil buildup.

FEATURES AND BENEFITS

- Individual packing
- Odorless
- Continuous distribution

DIRECTION FOR USE

Techniques Place ring directly into the drain.

IODO RING TAMED IODINE RING

PHYSICAL PROPERTIES

Appearance

Plastic ring containing iodine based substance

Odour

Odorless

Specific gravity @ 20°C
