

## **LIQUID CHLORINE**

SODIUM HYPOCHLORITE SOLUTION

**LIQUID CHLORINE** is a disinfectant and high concentration chlorinated liquid sanitizer for food processing industries.

**LIQUID CHLORINE** is authorized as a no-rinse sanitizer when the concentration of free chlorine in its solution does not exceed 200 ppm.

The fact that it does not foam allows **LIQUID CHLORINE** to be used by circulation in milklines and other sanitary stainless steel piping systems.

## **FEATURES AND BENEFITS**

- · High concentration of sodium hypochlorite
- · Easy to handle
- · Compatible with alkaline products
- Non-foaming
- Used as a sanitizer containing 200 ppm of free chlorine, it acts quickly and indiscriminately on all types of microorganisms
- Very useful when used as an additive to alkaline products, it improves the capacity to degrade proteins and is used as a bleaching agent

**DIN 02012243** 

## DIRECTION FOR USE

Use procedure Dilut

**DISINFECTANT AND SANITIZER** 

Dilute **LIQUID CHLORINE** in cold potable water. Apply to surfaces or circulate in pipelines.

Concentration D

**DISINFECTANT:** 5 ml per litre

**SANITIZER:** (1.3 ml/L) of **LIQUID CHLORINE** will give 200 ppm of free chlorine.

No rinse needed.

SHOCK TREATMENT:

1000 to 2500 ppm of free chlorine (0.6 to 1.6% - 6 to 15 ml / litre of **LIQUID CHLORINE**) Rinse food contact surfaces with potable water.

**Use temperature** 

Below 30°C (86°F).

**Dwell time/Operation time** 

1 minute minimum.

**Mechanical action** 

Ensure that product comes into contact with all surfaces to be sanitized.

Reuse/recycling

Not possible.

Soils to be removed

**ADDITIVE FOR ALKALINE PRODUCTS** 

Baked or dried protein based food deposits, low coloured film of unwanted food deposits.

Use procedure

Add **LIQUID CHLORINE** to prepared alkaline solution and according to the instructions of the manufacturer of the alkaline product. Apply according to procedure recommended by same manufacturer.

Concentration

Between 0.5% and 2.0% (5 ml to 20 ml / Litre) of LIQUID CHLORINE is usually enough for desired results.

Rinsing

Rinse with potable water.

## **INCOMPATIBILITY**

Acids, oxidizing agents, amines, ammonia, nitrites, reducing agents, organic compounds

### **WAREHOUSING PRECAUTIONS**

Keep containers tightly closed in a dry, cool and well-ventilated place

## **AVAILABLE SIZES**

### **IMPORTANT**

Before using **LIQUID CHLORINE**, always be sure to read and follow precautions and directions for use appearing on the product's container label, and on the safety data sheet (S.D.S).

## FIRST AID MEASURES

### Eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.

Excellent

## Skin contact

Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.

#### Inhalation

Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

#### Ingestion

Do not induce vomiting. Drink 1 or 2 glasses of water. Call a physician or Poison Control Centre immediately. Never give anything by mouth to an unconscious person.
