VAP COMBI

All-in-one product for steam boiler water treatment

VAP COMBI is an all-in-one product designed for the treatment of steam boiler water. It simplifies treatment by reducing the need for multiple separate products. When used at the recommended dosage and according to instructions, it effectively protects steam boilers against oxygen corrosion and scale formation.

Direction for use:

Inject the product according to results of alkalinity and sulfite analyses in the boiler water.

The dosage of **VAP COMBI** depends on the characteristics of water (hardness, conductivity, overall water quality).
