VAP F

Steam boiler sludge conditioner

VAP F is a sludge conditioner for the treatment of steam boiler water. When used at recommended dosages and in accordance with monitoring guidelines, **VAP F** effectively protects steam boilers against scale formation. This product must be used in conjunction with **VAP OXY**, **VAP PLUS** and **VAP TR**.

Direction for use:

Inject the product according to results of fluorimetry analyses in the boiler water.

The dosage of **VAP F** depends on the characteristics of water (hardness, conductivity, overall water quality).
