

VAP PLUS

Concentrated liquid oxygen scavenger

eco-flo

FEATURES & BENEFITS

- ▶ Ultra-concentrated and catalyzed product that reacts very rapidly with oxygen
- ▶ Neutral product, providing enhanced stability during use

VAP PLUS is an ultra-concentrated and catalyzed oxygen scavenger that reacts very rapidly with dissolved oxygen in water. It is used in steam boilers in combination with **VAP CB/VAP F** and the **COMBI/AM** series. One of its key features is that it is neutral, which provides enhanced stability and significantly reduces the risk of off-gassing during use.

Direction for use:

Inject the product according to results of sulfite analyses in the boiler water.

The dosage of **VAP PLUS** depends on the water characteristics (hardness, conductivity, overall water quality).
