

VAP TR220

eco·flo

FEATURES & BENEFITS

- ▶ Concentrated product
- ▶ Maintains condensate pH within compliant levels
- ▶ Minimal impact on water conductivity

Neutralizing volatile amines

VAP TR220 is a concentrated product containing two neutralizing volatile amines. It neutralizes carbonic acid in condensate lines and provides protection against corrosion.

Direction for use:

Inject the product according to the results of the condensate pH analyses.

The dosage of **VAP TR220** depends on the water characteristics (hardness, conductivity, overall water quality).

VAP TR220

Neutralizing volatile amines

Appearance	Clear, yellowish liquid
Odour	Strong amine
Specific gravity @ 20°C	0.99-1.00
Viscosity	< 10 cp @ 20°C
pH	12.5 - 13.0
Flash point (TCC)	57°C
Water solubility	Complete
Auto ignition temperature	None
Boiling point	100°C
Freezing point	-4°C
Foaming tendency	Non-foaming
Concentration monitoring techniques	Condensate pH
Rinsing	Excellent

INCOMPATIBILITY

Acids, hypochlorites

WAREHOUSING PRECAUTIONS

Keep containers tightly closed in a dry, cool and well-ventilated place.

AVAILABLE SIZES

		
20Kg	205Kg	

FIRST AID MEASURES

Eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor or a physician.

Skin contact

Remove, take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse.

Inhalation

Remove person to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor or physician.

Ingestion

Do not induce vomiting. Drink 1 or 2 glasses of water. Call a physician or Poison Control Centre immediately. Never give anything by mouth to an unconscious person.

PERSONAL PROTECTION

WHMIS

Refer to the product Safety Data Sheet (SDS) for all properties.
