

WESTQUAT ACID

RINSE-FREE ACID SANITIZER

WESTQUAT ACID is a quaternary ammonium and phosphoric acid based sanitizer, intended for processing and handling food industry, that requires no rinse after application.

WESTQUAT ACID can be left on surfaces where even after drying, it leaves a thin film which retains all its effectiveness. This contributes to keep the surface sterile until the next use of the equipment.

FEATURES AND BENEFITS

- Odorless and colorless
- Chemically stable
- Non-volatile
- Product with acidic pH
- Very effective on a very wide variety of microorganisms including bacteria, yeasts and molds
- Does not require rinsing when used as recommended

DIRECTION FOR USE

Techniques

After cleaning and rinsing the surfaces, cover them with a solution containing 25 ml of **WESTQUAT ACID** per 10 liters of water.

This corresponds to a concentration of 200 ppm of active ingredients.

Leave in for 10 to 15 minutes before reusing the production equipment.

WESTQUAT ACID can be used at concentrations up to 5 times higher to achieve a more powerful sanitizing effect or more effective descaling. It will then be necessary to rinse equipment thoroughly with potable water before reuse.

WESTQUAT ACID RINSE-FREE ACID SANITIZER

PHYSICAL PROPERTIES

Appearance	Clear, almost colorless liquid
Odour	Faint detergent
Specific gravity @ 20°C	1.15
Viscosity	<10 cps
pH	<1
Flash point (TCC)	None
Water solubility	Complete
Auto ignition temperature	None
Chlorine	None
Boiling point	100°C
Freezing point	Not available
Foaming tendency	Moderate
Concentration monitoring techniques	Refractive index, titration
Rinsing	Excellent

INCOMPATIBILITY

Bases, organic materials, light metals, bleach

WAREHOUSING PRECAUTIONS

Keep containers tightly closed in a dry, cool and well-ventilated place

AVAILABLE SIZES

			
2 X 4L	20L		

IMPORTANT

Before using **WESTQUAT ACID**, always be sure to read and follow precautions and directions for use appearing on the product's container label, and on the safety data sheet (S.D.S).

FIRST AID MEASURES

Eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.

Skin contact

Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.

Inhalation

Remove person to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

Ingestion

Do not induce vomiting. Drink 1 or 2 glasses of water. Call a physician or Poison Control Centre immediately. Never give anything by mouth to an unconscious person.

PERSONAL PROTECTION
